EASY LINE

domino®

LA FIORIERA componibile

Standard Domino: choose, combine, create

Standard formats designed to be easily combined
for complete design freedom.

Creating an organized and functional space can be simple and fast.

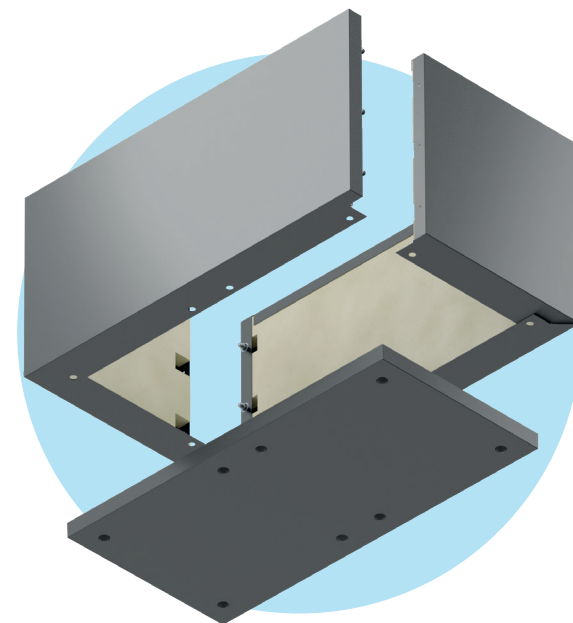

Domino Easy Line is the Domino planter collection designed to offer a modular, immediate, and reliable solution, suitable for different settings: terraces, gardens, contract spaces, and retail environments. A planter system created for those seeking the right balance between aesthetics, functionality, and affordability, with the guaranteed quality of Made in Italy.

Composability and Modularity

Formats designed to be intuitively
combined with one another.

Ready-to-sell kits

Supplied disassembled, lightweight,
and easy to transport and handle.

Built to last,
designed to simplify

Quick and easy assembly

Just a few steps, no complexity.

The advantage of modularity

Domino Easy Line was created with a clear principle in mind: simplifying the design of outdoor spaces. Thanks to **standardized dimensions** and **carefully designed proportions**, the planters can be easily placed side by side and combined to create linear, corner, or more articulated compositions without the need for custom-made solutions.

A modular system that offers:

- Design freedom
- Long-term adaptability
- Easy selection and planning

Standard sizes, maximum efficiency

Standardization helps optimize time and costs, while ensuring consistent availability and fast delivery.

- Fast delivery times
- Consistent availability
- Easy selection, without complex planning

A practical solution for those looking for a **reliable and readily available product**, without compromising on quality.

Practicality without compromise

Every detail of the Domino Easy Line collection is designed to **simplify operations and enhance the user experience**:

- Supplied disassembled to facilitate transport and on-site delivery
- Quick and intuitive assembly, without the need for complex tools
- Insulated structure designed to protect roots from temperature fluctuations
- Anti-wear plastic base, durable and designed for long-lasting performance

A ready-to-use solution, designed to perform from the very first moment.

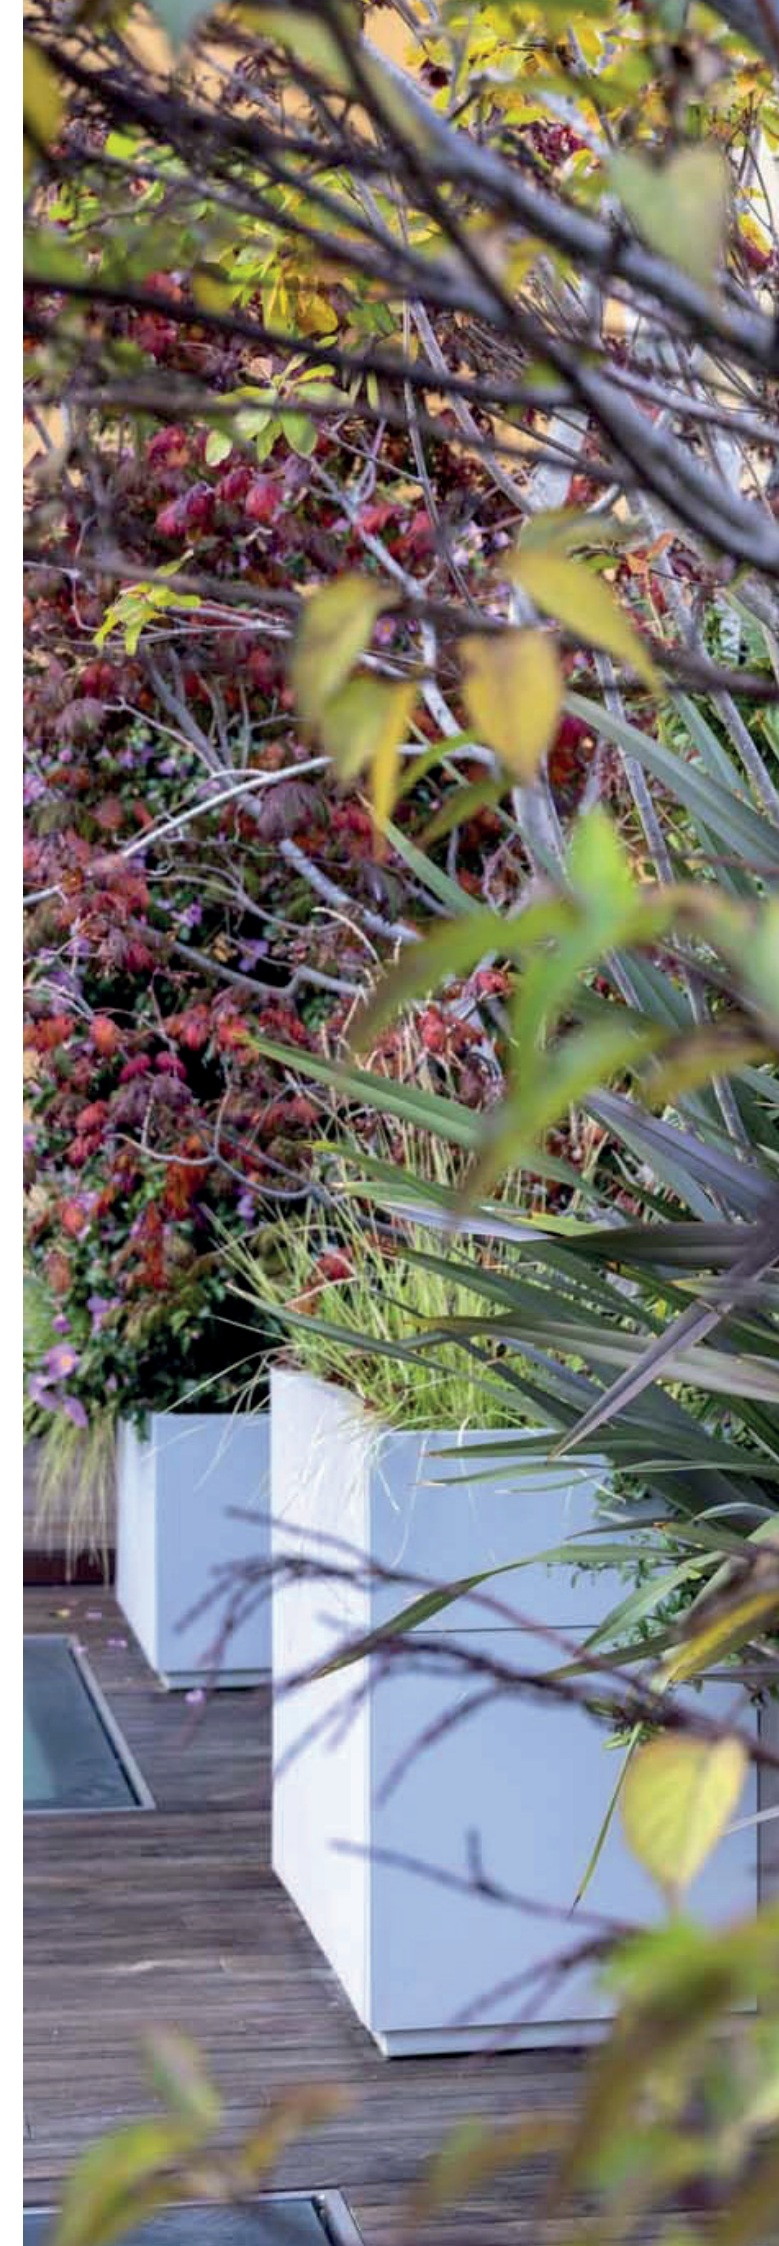

Made in Italy quality

Entirely produced in Italy using **carefully selected materials and controlled manufacturing processes**, ensuring reliability and continuity over time.

A short supply chain that guarantees:

- Consistent quality
- Attention to detail
- Long-term reliability

A product designed to last and enhance every outdoor space.

Two materials, two interpretations

The Domino Easy Line range is available in two different materials, designed to meet a variety of aesthetic and functional needs.

Polypropylene

Lightweight and everyday practicality

The polypropylene version is designed to offer maximum practicality without compromising on quality or aesthetics. Lightweight, durable, and easy to handle, it is ideal for those looking for a versatile solution that is simple to manage and perfectly suited for dynamic or seasonal use.

Key features:

- Lightweight and durable material
- Easy to move and reposition
- Weather-resistant
- Low maintenance
- Excellent value for money

Available colors – polypropylene:

Easy Line Polypropylene

- ✓ Simple
- ✓ Practical
- ✓ Cost-effective

When to choose it

- When you want simplicity and speed
- When you are looking for a practical and efficient solution
- When you want to make the most of your budget

Metal

Strength built to last

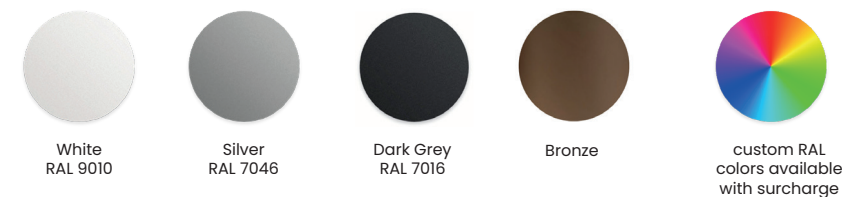

The metal version represents the more structured side of the Domino Easy Line range. Designed to ensure strength, stability, and long-lasting durability, it is the ideal choice for exposed outdoor environments and projects that require a stronger architectural presence.

Made of 15/10 galvanized steel with a powder-coated finish, the planters are treated to withstand weather conditions while maintaining their aesthetic and functional qualities over time.

Key features:

- High-strength metal structure
- Anti-corrosion treatment and powder coating
- Excellent stability and durability
- Ideal for continuous outdoor use
- Clean, architectural, and contemporary aesthetics

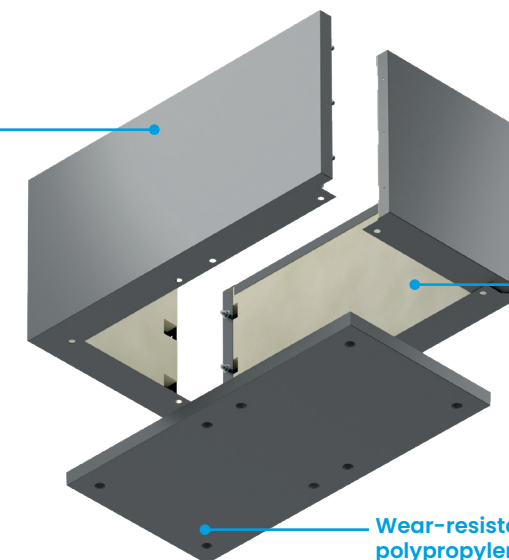

Available colors – powder-coated metal:

Easy Line Metal

- ✓ Solid
- ✓ Stable
- ✓ Architectural

Easy and quick to assemble

Integrated insulation

Each planter is equipped with a 30 mm extruded polystyrene insulation panel that creates a thermal barrier between the metal and the soil, helping to protect plant roots from temperature fluctuations.

Wear-resistant polypropylene base

The wear-resistant polypropylene base, equipped with four 1 cm feet, is designed for long-term durability and is guaranteed for life, ensuring stability and protection for the plants.

When to choose it

- When strength and stability are essential
- When you want a more defined and structured solution
- When you are looking for a stronger architectural presence
